Решения

1. Добавить glibc

```
FROM alpine:3.14
```

```
RUN apk update && apk add --no-cache gcompat libstdc++
```

Решения

2. Запустить на сборочном образе или там, где есть все библиотеки

```
FROM ghcr.io/graalvm/native-image-community:17
```

```
COPY --from=build-native /app /app
```

```
ENTRYPOINT ["/app"]
```

Ваш иماج

~800 MB

Решения

3. —static

#26 19.42 Error: Detected an instance of Random/SplittableRandom class in the image heap. Instances created during image generation have cached seed values and don't behave as expected.

at java.security.SecureRandom.<init>(SecureRandom.java:224)

at sun.security.jca.JCAUtil.getDefSecureRandom(JCAUtil.java:96)

at java.security.KeyPairGenerator.initialize(KeyPairGenerator.java:376)

Пробуем дальше `--no-fallback --initialize-at-build-time`

Error: Detected an instance of `Random/SplittableRandom` class in the image heap. Instances created during image generation have cached seed values and don't behave as expected. To see how this object got instantiated use `--trace-object-instantiation=java.util.Random`. The object was probably created by a class initializer and is reachable from a static field. You can request class initialization at image runtime by using the option `--initialize-at-run-time=<class-name>`. Or you can write your own initialization methods and call them explicitly from your main entry point.

Пробуем дальше `--initialize-at-run-time`

```
FROM ghcr.io/graalvm/native-image-community:17 as build-native
WORKDIR /app

unit 50/50
integration

Есть несколько решений

- 1) “Плохое”
- 2) “Хорошее”
- 3) Хорошее, но не всегда возможное
- 4) Очень Хорошее

“Плохое”: java-agent

```
resource-config.json  
reflect-config.json  
jni-config.json  
predefined-classes-config.json  
proxy-config.json  
serialization-config.json
```

“Плохое”: multi stage build jar

```
FROM native-image-community:17 AS trace
```

```
WORKDIR /app
```

```
COPY pom.xml .
```

```
COPY src ./src
```

```
COPY mvnw .
```

```
COPY .mvn .mvn
```

```
RUN ./mvnw clean test
```

-agentlib:native-image-agent=conf=dir

“Плохое”: multi stage package

```
FROM native-image-community:17 as tracer
```

```
FROM openjdk:17-jdk-alpine AS metha
```

```
WORKDIR /app
```

```
COPY pom.xml .
```

```
COPY src ./src
```

```
COPY --from=tracer configs .resources/META-INF/native-image
```

```
COPY mvnw .
```

```
COPY .mvn .mvn
```

```
RUN ./mvnw clean package
```

“Плохое”: multi stage package

```
FROM native-image-community:17 as tracer
```

```
FROM openjdk:17-jdk-alpine AS metha
```

```
FROM native-image-community:17 as build-native-test
```

```
WORKDIR /app
```

```
COPY --from=metha |joker-ignite-tests1.0.jar| ./app.jar
```

```
RUN native-image joker-ignite-1.1-tests.jar
```

```
--no-fallback
```

```
-o /target/native-tests
```

```
-D.j.p.l.uid.tracking.output.dir=/test-ids
```

```
org.graalvm.junit.platform.NativeImageJUnitLauncher
```

```
RUN ./native-tests
```

“Плохое”: multi stage package

```
FROM native-image-community:17 as tracer
```

```
FROM openjdk:17-jdk-alpine AS metha
```

```
FROM native-image-community:17 as build-native-test
```

```
FROM native-image-community:17 as build-native
```

```
WORKDIR /app
```

```
COPY --from=metha joker-ignite-1.0.jar ./app.jar
```

```
RUN native-image -jar app.jar
```

“Плохое”: multi stage package

```
FROM openjdk:17-jdk-alpine AS build
```

```
FROM native-image-community:17 as tracer
```

```
FROM openjdk:17-jdk-alpine AS metha
```

```
FROM native-image-community:17 as buildnative
```

```
FROM alpine:3.14
```

```
WORKDIR /app
```

```
COPY --from=buildnative /app /app
```

```
ENTRYPOINT ["/app"]
```

“Хорошее”: native-maven(gradle)-plugin

```
<plugin>
  <groupId>org.graalvm.buildtools</groupId>
  <artifactId>native-maven-plugin</artifactId>
  <version>${native.maven.plugin.version}</version>
  <extensions>true</extensions>
  <executions>
    <execution>
      ...
    </execution>
  </executions>
  <configuration>
    <buildArgs>
      --static --no-fallback --initialize-at-run-time=...--initialize-at-build-time
    </buildArgs>
  </configuration>
</plugin>
```

run test with
agent

```
[INFO]-----

“Хорошее” решение: немного о проблемах

```
<ignite.jvm.options>
```

```
--add-opens=java.base/jdk.internal.access=ALL-UNNAMED
```

```
--add-opens=java.base/jdk.internal.misc=ALL-UNNAMED
```

```
--add-opens=java.base/sun.nio.ch=ALL-UNNAMED
```

```
... .
```

```
</ignite.jvm.options>
```

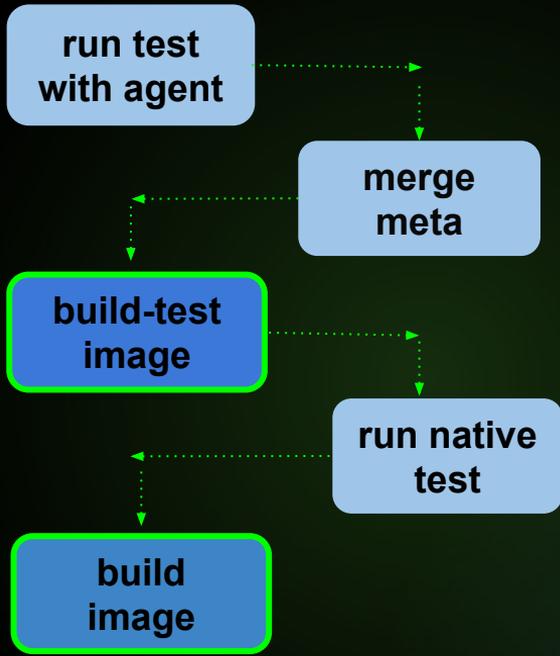

<https://github.com/graalvm/native-build-tools/pull/615/commits/f3d0bf3d38993dde1324f7f8c482f3fa15c575a5>

Хорошее, но не всегда ВОЗМОЖНОЕ

ignite-core

JAR

```
|— ignite-core
  |— java
    ...
  |— resources
    |— ignite.properties
    |— META-INF
      |— classnames-jdk.properties
      |— classnames.properties
      |— native-image
        |— jni-config.json
        |— predefined-classes-config.json
        |— proxy-config.json
        |— reflect-config.json
        |— resource-config.json
        |— serialization-config.json
```

```
Apply jar:file:/.m2/org/apache/ignite/ignite-core/2.15.0/ignite-core-2.15.0.jar!/META-INF/native-image/jni-config.json
```

```
Apply jar:file:/.m2/org/apache/ignite/ignite-core/2.15.0/ignite-core-2.15.0.jar!/META-INF/native-image/reflect-config.json
```

```
Apply jar:file:/.m2/org/apache/ignite/ignite-core/2.15.0/ignite-core-2.15.0.jar!/META-INF/native-image/resource-config.json
```

```
Apply jar:file:/.m2/org/apache/ignite/ignite-core/2.15.0/ignite-core-2.15.0.jar!/META-INF/native-image/proxy-config.json
```

...

Очень Хорошее: graalvm-reachability-metadata

```
<plugin>

Очень Хорошее: graalvm-reachability-metadata

```
<metadataRepository>  
<enabled>true</enabled>  
<url>${metadata.url}</url>  
</metadataRepository>
```

Итоги

- Стоит взвесить все за и против
- Стоит понимать, что `native images` применимы для определенного класса приложений
- Рассмотрели часть проблем, с которыми можно столкнуться, и как их решить
- Рассмотрели варианты, с помощью которых можно настроить инфраструктуру сборок так, чтобы все было ок, собиралось и тестировалось
- Получили способ писать легковесные сайдкары для приложений бонусом
